# **Currency Exchange Rate**

In order to use the currency exchange rate functionality in Fuse5 you must first ensure that you have set up the appropriate settings. There are four steps:

<u>Step 1: SETTINGS > PERSONAL SETTINGS > CURRENCIES.</u> The user will go to Currencies interface and establish the currencies that you need in Fuse5. You do this by clicking on the NEW CURRENCY button, choose the currency name, and conversion rate. The currency code and symbol should automatically populate. Once you have selected your currency, hit save.

<u>Step 2: Under PERSONAL & ADMIN > SETTINGS > COMPANY DETAILS > EDIT</u> (at top right of screen). At this point you should choose your Base Currency. This is the currency that your company deals in on a day to day basis. Only the currencies set up in the CURRENCIES module will show as available here.

Factor receiving on receiving exchange i	rate ON Factor receiving on receiving exchange rate .	

<u>Step 4: PRODUCT MANAGEMENT > VENDORS ></u> choose the vendor. Within a vendor record you can select the "Default Currency" for the vendor. Again, only the currency set up in the CURRENCIES module will be available. This can be done through an import or by individually updating the vendor records.

Return Tracking Field	
Approved Vehicle Expense Vendor	No
Default Currency	USA, Dollars

# Once you have made the appropriate settings you will now be able to see the value of foreign currency when creating a purchase order or receiving from a vendor that you pay in currency other than your default currency.

Once all of the above listed settings are in place, you can create purchase orders and receive parts and consider other currency valuations. Let's start with the Purchase Order. When you create a PO and you are ordering from a vendor that uses a different currency than your companies normal currency, you will see a box below where you save a template and above the parts on the PO. It looks like this.....

	Save Template ?					
			Euro	• 0.8000		
QoH		QoH ТА		Cost	Core Cost	
0 MTD: 0 YTD: 0 LYS: 0 L12: 0 YDR: 0 LYR: 0		0 0, 0 0	1 0, 0, 0 1, 0, 0, 1	10 Cost Ext: 10.000 C: €8.000	5.000 Core Cost Ext: 5.000 Core C: €4.000	

The exchange rate is coming from the CURRENCIES interface. As the user you can either leave the exchange rate (in this case .80), you can change it for the PO, or change it in the CURRENCIES interface from the PO. If you double click on the exchange rate (again, the .80 in this scenario), make a change and click off the box, you will get a pop up that asks if you want to update for Fuse5 as a whole. If you click OK, it will update the PO and the CURRENCIES interface. If you click CANCEL, it will update this PO, but not the CURRENCY interface.

Sample of Data Flow:

In this scenario the vendor A & I Products has been set up with a Base Currency as the "Euro". A Special Buy purchase order has been created with a dollar cost of \$15 which equates to 12 Euros. Notice that if the vendor record is set up with their default currency, the PO interface automatically shows Euros in the currency exchange box above the line items on the PO.

			Euro		▼ 0.8000	
ТА	Order Qty	Cost			Core Cost	
0 0, 0 0	1 0, 0, 0 1, 0, 0, 1	10 Cost Ext: 10.000 C: €8.000		5.000 Core Cost C <mark>ore C: €</mark> ⁄	Ext: 5.000 4.000	
		0.000 Cost Ext: 0.00 C:		0.000 Core Cost Core C:	Ext: 0.000	
Freight	PPD Based On:	Freight PPD: 0.	00 Curr	rent: 0.00	Remaining: 0.00	
			Total Qty			1
	(+) 5	Shipping & Handling	) Charges		0	
		(+) 5	ourcharge		0	
		(+) Small Orde	er Charge	· · · · · · · · · · · · · · · · · · ·	0	
		(+	) Freight		0	
		<u>?</u>	(+) Duty		• 0	
		Cost Pri	ce Total :		10.00 €8.00	0
		Core Pri	ce Total :		5.00 €4.00	0
		(-)	Discount		0.0 €0.00	0
		Gra	nd Total		15.000 €12.000	D

The next step in the process is the receive the purchase order. When the PO number is entered, Fuse5

recognizes that this is from a vendor that has a default currency of "Euros". The dollar and Euro values are both displayed in the receiving module. You can edit either of these costs by double clicking on them. At that point a text entry box becomes available. If you change either cost, the other will be updated based on the exchange rate.

		<u>Eu</u>	ro(€)	Print Labels   • 0.8000
PO Number For Receiving Quantity	PO Cost Price	PO Core Price	Related SO 📀	Print Labels
P6-33770 A & I Products	10.000 \$ ∰ C: €8.000	5.000 C: €4.000		
		Rec	eived Qty	1
	Price Ext	10.000 €8.000		
	Price Ext	5.000 €4.000		
		Gi	rand Total	15.000 €12.000

Once the PO is received you will see the following entries in QuickBooks.

The Merchandise Inventory CoA (Other Current Asset CoA) and Core Inventory CoA (if applicable) is increased based on the dollar amount of the current cost of the parts on the PO.

Ϊ

The next step is to do Vendor Invoice Reconciliation (VIR) for the Purchase Order. Notice that the currency defaults to Euro as this vendor is recognized as having that default currency. Additionally, you can change either your base currency or foreign currency cost if there are discrepancies. Finally, because this vendors default currency is different than your base currency the "Push Foreign Currency to QB" button is defaulted as checked. This is what causes the bill in QuickBooks to be created with the foreign currency.
